Customer Reviews

Length: 34 pages.Before going into a great detail to explain why I rated this book as I did, I want to interject this:RV Boondocking For Beginners by Steve Plant, 2014 edition is a book best obtained either while it is on KDP giveaway (free download) or by utilizing Kindle Unlimited. Why?Now you are ready for the rest of the story...Most of the tips provided are indeed mere common sense or are otherwise easily obtained in a google or google search. Yet, the accompanying photographs and the straightforward discussion is refreshing and eliminates the need to sift through hundreds of web pages.Unlike a short (21 page) booklet I reviewed earlier today, this does have several good tips

and advice that might not be so easily understood if one is sifting through those other sites. Having stated to virtues, there are a couple of constructive suggestions to improve the usefulness of this presentation. 1 - Provide photographs of the sorts of troubles one might want to beware of, and of the good examples. 2 - Provide photographs of some of the devices, such as tarps, water hoses and so forth. Or explain what makes a good water hose a safe hose for potable water and why. Oh, and one thing more: Discuss precisely what purchasers of older motorhomes might encounter. Vapor Lock comes to mind, due to my own negative experience, but there are other topics newbies will want to read about. I could go on, but don't believe a writer with the skills, talent, and motivation of RV Boondocking needs an itemized list. As I stated at the outset - this brief booklet might not be worth spending three bucks for.
