## Customer Reviews

What attracted me most to this book you, apart from the fact that my son needs this, is that it has some memory improvement techniques that were discussed so well. I am positive that these techniques will teach my son some learning strategies so that he can learn faster. Good thing that I came across this book, this would really help my son in improving his memory. The things and facts given here can improve his memory and will also teach him how to keep focus and remember things for long periods. This is what he needs when he goes to college. This is extremely a great guide that

has covered all the memory improving techniques as well as tips for memory enhancement. Plus it has given 10 foods that will help improve his memory more. This is such a bonus!

I am giving this book a very high rating because I think I read it but I can't remember but I'm guessing that it was very, very good. There are some people out there with great memories and excellent interpersonal skills. We've all probably met someone like this.... They seem to remember your name, your face, and little details about your life and past conversations way more than the average person. And we all LOVE being around these people. They make us feel important and valued, because it could be a year since you've seen them (and you only met them once), and they will recall specific details about your life and ask about them ("How is your grandmother doing? Last time we talked, she had just fallen and broken her hip. I hope she is doing ok."). I totally want to be one of those people. Hence this book! It is full of excellent exercises to strengthen your memory, to become one of those great people who make others feel so valued...all because of an acute awareness and a strong memory. I'm still in the middle of the book, but I am truly invested into trying everything so that I can improve. The book is great because it provides little exercises to help you see immediate progress. Not quite changing the world with my memory yet, but I'm hoping this will help. Next time we have a conversation, I promise I'll remember!
