How Dogs Think: What The World Looks Like To Them And Why They Act The Way They Do

Synopsis

Bestselling author, psychologist, and world-renowned expert on dog behavior and training Dr. Stanley Coren presents the most informative, in-depth, fascinating book yet on dogs. Bestselling author, psychologist, and world-renowned expert on dog behavior and training Dr. Stanley Coren presents the most informative, in-depth, fascinating book yet on dogs. Acclaimed for its solid scientific research and entertaining, eminently readable style, *How Dogs Think* gives you the insight that you need to understand the silly, quirky, and apparently irrational behaviors that dogs demonstrate, as well as those stunning flashes of brilliance and creativity that they also can display. It lets you see through a dog's eyes, hear through his ears, and even sense the world through his nose, as Coren presents a fascinating picture of the way dogs interpret their world and their human companions, and of how they solve problems, learn, and take in new information. *How Dogs Think* also answers questions about our canine companions that have puzzled many: Can dogs count? Do they have an appreciation of art or music? Can a dog learn how to do something just by watching another dog or even a person do it? Do dogs dream? What is the nature of dog personality? Which behaviors are prewired into your dog, and which can you actually change? And, can dogs actually sense future earthquakes or detect cancer? With sound behavioral science and numerous funny, informative anecdotes, experiments, and firsthand observations, *How Dogs Think* shatters many common myths and misconceptions about our four-legged friends and reveals a wealth of surprises about their mental abilities and potential. It will make you love and appreciate all dogs—including your own—in wonderful new ways.

Book Information

Paperback: 368 pages

Publisher: Atria Books (June 6, 2005)

Language: English

ISBN-10: 0743222334

ISBN-13: 978-0743222334

Product Dimensions: 5.5 x 1 x 8.4 inches

Shipping Weight: 10.4 ounces (View shipping rates and policies)

Average Customer Review: 4.3 out of 5 stars (See all reviews) (59 customer reviews)

Best Sellers Rank: #72,478 in Books (See Top 100 in Books) #14 in Books > Science & Math > Biological Sciences > Zoology > Animal Psychology #383 in Books > Crafts, Hobbies & Home > Pets & Animal Care > Dogs

Customer Reviews

In his usual thorough and "text-booky" approach, before he takes on the real question of how dogs think, Coren wants us to fully understand how information, used in the thought process, gets into the mind of the dog in the first place. To this end, he takes us on a detailed study of eyes, ears, nose, tongue and touch. Many implications for animal trainers are strewn throughout the entire manuscript. Along the way, he imbeds other useful suggestions for dog owners on how to get finicky eaters to eat, how to test your elderly dog's eyesight and hearing and how to compensate for weaknesses that commonly afflict elderly dogs. He even addresses the question of whether dogs have a sixth sense that allows them to predict earthquakes or anticipate exactly when their master will arrive home. Yes, I love the way he puts this section together and, no, I won't divulge his conclusion. Did I say "text-booky"? *How Dogs Think* has been very thoroughly researched with over 241 citations. It would make a fine text book as part of an extensive canine trainer certification program like that offered by the Animal Behavior College [...] for example. Coren can be rather technical at times, using and defining terms like "invisible displacement test", "implicit", "explicit", "episodic", and "semantic" memory. Bottom line, it's his approach that's both the good and the bad about the book. While it's what I was looking for, it may not be what you are looking for. Finally, on page 290 (with less than 10% left to read), Coren asks the real question: are dogs conscious and do they have a mind similar to our own? His conclusion, they are considerably different from us in degree but not really all that different in kind.
